

GROWING U.S. COPPER RESOURCES

Faraday Copper is an exploration company, publicly traded on the Toronto Stock Exchange. The Company is focused on the exploration and advancement of the Copper Creek project in Arizona, **one of the largest undeveloped copper projects in North America**, with both open pit and bulk underground mining potential.

INVESTMENT HIGHLIGHTS

- **Large undeveloped resource:** >4.2 Blbs of contained copper Measured and Indicated Mineral Resources at Copper Creek ¹
- **Significant exploration upside** with ongoing drilling, new near-surface discoveries and a portfolio of untested targets
- **Updated technical report in Q3 2025 targeting enhanced project economics**
- **Experienced management team and Board of Directors**
- **Current U.S. Administration is highly-supportive of domestic mining projects**

UPSIDE

- **Targeting new discoveries** in an underexplored district
- **Growing the resource** through definition of high-grade zones and step-out drilling
- **Value engineering** aimed at higher production rates and processing optimization
- **Gold program** targeting potential gold inclusion in future resource updates

COPPER CREEK PROJECT

- **District exploration upside** with several hundred breccias mapped, less than 40 drill-tested and only 17 included in the Mineral Resource. Breccias offer high-grade, near-surface mineralization potential and underpin the open pit resource
- **Excellent jurisdiction and infrastructure** with access to roads, rail, power and skilled labour
- **Preliminary Economic Assessment ("PEA")** ¹ base case outlines a combined open pit and bulk underground mine, low initial capital investment and over three billion pounds of payable copper production during a 32-year mine life

CATALYSTS

- **Phase III drill program** results (Completed in April 2025)
- **Technical Report** update (Q3 2025), targeting:
 - Updated Mineral Resource
 - Increased throughput and annual metal production
 - Maintaining low initial capital
 - Enhanced project economics

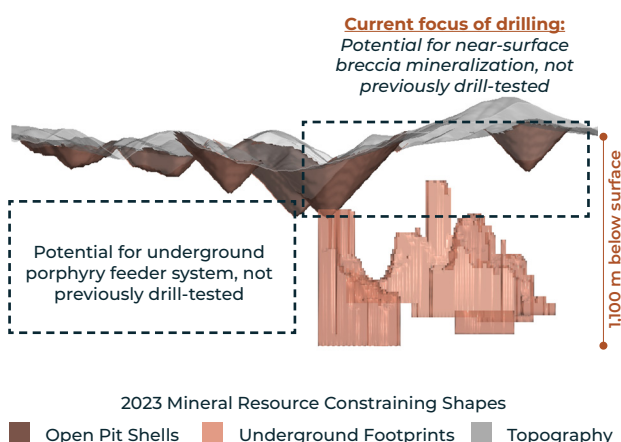

MINERAL RESOURCE ESTIMATE¹

- 83% of the Mineral Resources are in the M&I category
- Geologically constrained, robust metallurgical test work, geotechnical studies
